Summary

Transitioned from Mechanical Engineering to Full Stack Web Development, leveraging a strong foundation in structural thinking, rigorous analysis, and a passion for complex problem-solving. Equipped with hands-on experience building scalable MERN stack applications through intensive training. Seeking to leverage these technical and analytical skills as a Junior Full Stack Developer.

Education

Uplift Code Camp, *Full Stack Web Development*
08/20/2026
Completed 300+ hours of intensive, hands-on software development training

BHC (Bataan Heroes College), *BSME (Mechanical Engineering)*
2020 | Balanga, Bataan

Professional Experience

Site Engineer, *Assistco Energy & Industrial Corporation*
08/2023 – 06/2024

- Mapped insulation systems
- Provided daily updated maintenance progress reports
- Coordinated work schedules with client and 3+ sub-contractors to ensure on-time delivery of projects

Projects

Poultry Manager | MongoDB, Express.js, React, Node.js (MERN Stack)

- Developed a full-stack poultry farm management application using the **MERN stack** to help my family's poultry business streamline daily operations and reduce manual record-keeping.
- Built features for **poultry batch management, egg production tracking, and financial monitoring**, with monthly reports to help track farm productivity, income, expenses, and net profit.
- Implemented **JWT authentication and role-based access control (RBAC)** to secure user accounts and restrict financial management to authorized owners.

Country Info Finder | HTML, CSS, JavaScript, REST Countries API, Gemini API

- Built a responsive country information app using **HTML, CSS, and Vanilla JavaScript**.
- Integrated the **REST Countries API** to fetch and display country data such as population, capital, region, and languages.
- Integrated the **Gemini API** to provide AI-powered country insights and recommendations.

Support Ticket Management System | JavaScript, Node.js

- Developed a command-line support ticket management system using **JavaScript and Node.js** to record and organize customer issues.
- Implemented **CRUD operations** to create, view, update, and delete support tickets, including status and priority management.
- Built ticket search functionality to filter issues by **ticket ID, status, and priority level** for efficient issue tracking.

Skills

Frontend — HTML • CSS • JavaScript • React

Backend — Node.js/Express

Database — MongoDB

APIs & Security — RESTful APIs • JWT

Build & Deployment — Vite • Netlify • Render • Vercel

Tools & Version Control — Gitlab • Github • Postman

Development Methodologies — Scrum • MVC Architecture

Transferable Skills — Problem Solving • Analysis • Cross-functional Collaboration
